

## BAND CLAMP INSTRUCTIONS.

The clamps should be seated facing the target & the screw and washer the user side of the frame.

OTT set up with large radii to the outside of frame.

TTF set up with large radii to the inside of frame.

Make sure the band is pushed up to the screw before tightening. A gentle nip will be enough to hold the bands in place but be sure to test before shooting.

All that is left is to enjoy owning your Wasp Slingshot & always remember to shoot safely and wear your safety glasses.
