

## TUBE ATTACHMENT INSTRUCTIONS.

Feed one end of your loop band set through the hole on one of the fork tips.

Rest the tube in the alignment slots of the plug. Then adjust making sure that the tube lengths are the same. Now pull the tubes whilst pushing the plug until the head of the plug rests against the frame.

Now repeat for your second fork tip checking that your pouch is in line with the bands ie. not twisted and are the same length and your then good to go.

All that is left is to enjoy owning your Wasp Slingshot & always remember to shoot safely and wear your safety glasses.
