IMP Clamp Instructions

The clamps should only be fitted to the Target side (non badged) of the frame and can be fitted to either fork tip as the clamp plates are symmetrical.

To set the band clamps for OTT shooting

Position the clamp plate with the clamp bar inside of the band groove on the frame.

Insert the M5 screw from the shooter (badged) side of the frame and screw in a couple of turns.

When fitting your band set, insert the band under the clamp ensuring that the band goes through the band groove & up to the screw. When the clamp plate is tightened the end of your band set should be fully under the clamping bar as the photograph below.

The clamping screws need only a firm nip to secure the band set. It is not necessary to over tighten the screw.

All that is left is to enjoy owning your Wasp Slingshot & always remember to shoot safely and wear your safety glasses.

Read Before Use

Cleaning The Frame. Use luke warm water with a mild soap; which is ideal for wiping down the frame then dry with a cloth or paper towelling. This is all that is required to clean the frame. **DO NOT** use any kind of solvents or aggressive cleaning substances.

DO NOT DRY USING A HEAT SOURCE.
DO NOT MODIFY THE FRAME IN ANY WAY.

Keep Frame away from oils, solvents, glues, polishes, heat sources and extreme freezing conditions do not store in direct sunlight. (Remember to Store the Slingshot away from Children and minors).

Damage to Frame. If you suspect that there is possibility of damage to the frame due to a Fork Hit or other impact source, fully inspect the Frame and **DO NOT SHOOT** until you are totally satisfied that the frame has full integrity. Nicks, Cuts, Bruises & Burrs to the Frame must be treated to the same manner of detailed inspection. Check the condition of Bands, Tubes and the pouch for damage or wear before each shot. If in doubt Throw it away! Slingshots can cause severe personal injury or death!

REMEMBER ALWAYS Wear Safety Glasses for EYE Protection. Slingshots, Ammo, and Band breakage are Dangerous to your Eyes. **DO NOT ATTEMPT TO USE** this frame without fully understanding the safety requirements and techniques required to shoot safely. Ensure you use an adequate ammo catch box or back stop before you shoot. Be aware of your location and surroundings when shooting - Are they SAFE! **DO NOT** shoot at hard solid surfaces or water; rebounds and ricochets are equally dangerous.
